

Hello parents and guardians,

In addition to the Star Family Report your child received, the information below will provide more context about your child's scores and performance.

A sample report is shown below. These scores will not match your child's scores.

1: SCALED SCORE

Scaled Score is useful for comparing student performance over time and across grades. A scaled score is calculated based on the difficulty of the questions and the number of correct responses.

2: BENCHMARK CATEGORIES

Each state or school district has established unique benchmarks that students must reach to be considered proficient. Use the Star Family Report to determine if your child is meeting expectations.

3: PERCENTILE RANK

Percentile Rank (PR) ranges from 1–99 and compares student performance to other students in the same grade nationwide. For example, a student with a percentile rank score of 37 performed as well as or better than 37 percent of other students in the same grade nationally.

4: GRADE EQUIVALENT

Grade Equivalent scores show how your child's test performance compares with that of other students nationally. For example, a second-grade student with a GE of 3.2 performed as well on Star as a typical third grader after the second month of the school year. This score doesn't necessarily mean that the student is capable of doing third-grade work. Instead, it indicates that this student's skills are above average for the second grade.

5: DOMAIN SCORES

Ranging from 0–100, domain scores estimate your child's mastery of each domain for the student's grade level. For example, a domain score of 50 for a third grader means the student would be expected to answer correctly about 50 percent of the third-grade items in that domain.

Please note: Students are not expected to have mastery of grade-level skills at the beginning of the year. Students are taught skills throughout the year and should move towards mastery as the school year progresses.

The domain scores are colored as Beginning (red), Developing (yellow), and Secure (green). Here are the categories for the scores:

- Beginning means 0–59 percent mastery
- Developing means 60–79 percent mastery
- Secure means 80–100 percent mastery

*Bella's score of **613** on the Star Reading test results in a placement in Level 2, below the target of Level 3. This score is higher than 37% of students in third grade and is typical of a 3rd grade student after the second month of the year.*
